Reginald L Alexander  
Primary Examiner  
Art Unit 1761  
United States Patent and Trademark Office  
Alexandria, VA 22313

Dear Mr. Alexander:

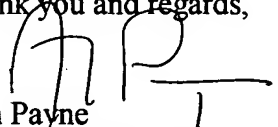

Per our conversation in June of 2005, attached please find new claims for Utility Patent Application #10/673,787.

The premise of my invention is that a steamer processes and a processor steams, food and or beverages. None of the patents referenced in your document conflicts with my claim to process along with steam, foods and beverages.

Per our conversation you agreed to accept my drawings as they are in the U.S.P.T.O. file number 10/673,787.

I will follow up to confirm your receipt and answer any questions you may have.

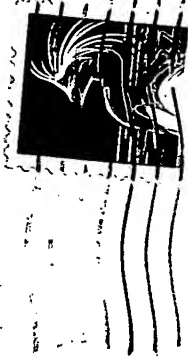

Thank you and regards,

  
Ann Payne
